ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: METHOD AND ARRANGEMENT FOR ADAPTIVE RATE CONTROL

(57) Abstract: The present invention
aims at enabling adaptive rate
control, ARC, in a packet switched
network, the ARC also being adapted
to the requirements of a specific
application. According to the
invention an arrangement for adaptive
rate control of a connection between
a sender and a receiver in a packet
switched data network comprises: A
generic control means for performing
adaptive rate control according to a
generic algorithm, said arrangement
being characterized by At least one
application specific control means,
said application-specific control
means being arranged to control the
function of the generic control means
in de-pendence of the characteristics
of the application.
